EdgeGards**

# innerpack™

High performance molded fiber packaging protection

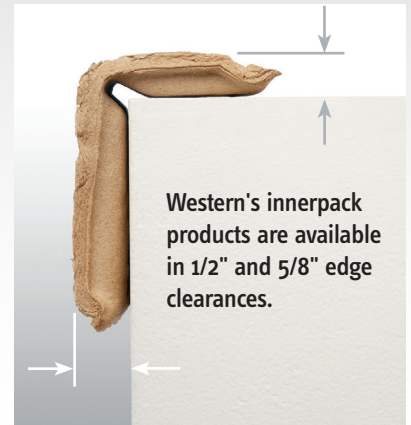

Ready to use  
right out of the box

WESTERN PULP PRODUCTS COMPANY

# performance

## Shock absorbing, no edge contact

A patented geometry of ribs and tunnels provide impact protection without direct contact to corners and edges. This ribbed design also absorbs impact, dissipates energy, and dampens vibration over a wide frequency range.

## Impact protection for edges and corners

This cut-away shows the rib-and-tunnel design which eliminates pressure points and abrasion on corners and edges.

To minimize surface abrasion,  
choose Shock Block innerpack  
for greater impact protection and a soft felt-like finish

The soft Shock Block surface reduces marring, scratching and the need for a protective liner.

# convenience

## For best results and maximum protection:

**Use the right size.** Western's corner and edge innerpack are designed for different applications and weight ranges. If you're not sure which size to use, call for assistance: (800) 547-3407.

**Use the right amount.** In most cases, more coverage means more protection.

**No gaps.** With Western's Innerpack in place, your product should fit snugly in its carton, with no excess room.

**No bulges.** Carton flaps should close uniformly.

## Ease of pack out

Western's innerpack for corners and edges are easy to use and easy on the user.

There's no cutting, assembling or repetitive motions required. Just set the Corners in place and snap apart the Edges to the length needed – there's no waste.

## The box-within-a-box for extra protection

Western's innerpack has a variety of applications. Manufacturers have discovered the versatility of using Western's innerpack in a box-within-a-box for added protection.

# assurance

## Knowledge and support

Let us show you how to use our corner and edge innerpack to best protect your product line. When you're ready to order, we'll work with you to determine exactly which innerpack protector is most cost-effective for you.
